

Full Lync Features Set

Server, Hybrid & Cloud

Design inspired by Skype

Enterprise Grade

# Skype for Business

**Skype for Business is an enterprise-ready unified communications platform.** With Skype for Business, users can keep track of their contacts' availability; send an IM; start or join an audio, video, or web conference; or make a phone call - all through a consistent, familiar interface. Skype for business is built to fully integrate with Microsoft Office.

## Design inspired by Skype

Simpler adoption based on familiarity, without compromising on features

## KEY FEATURES

### Enterprise Voice

Eliminating the need for separate PBX systems and simplifying your system for a big reduction in telephone-related expenses

### Office integration

Communicating with people from any of the Office apps, saving time and helping your people be more productive

### Connect people everywhere

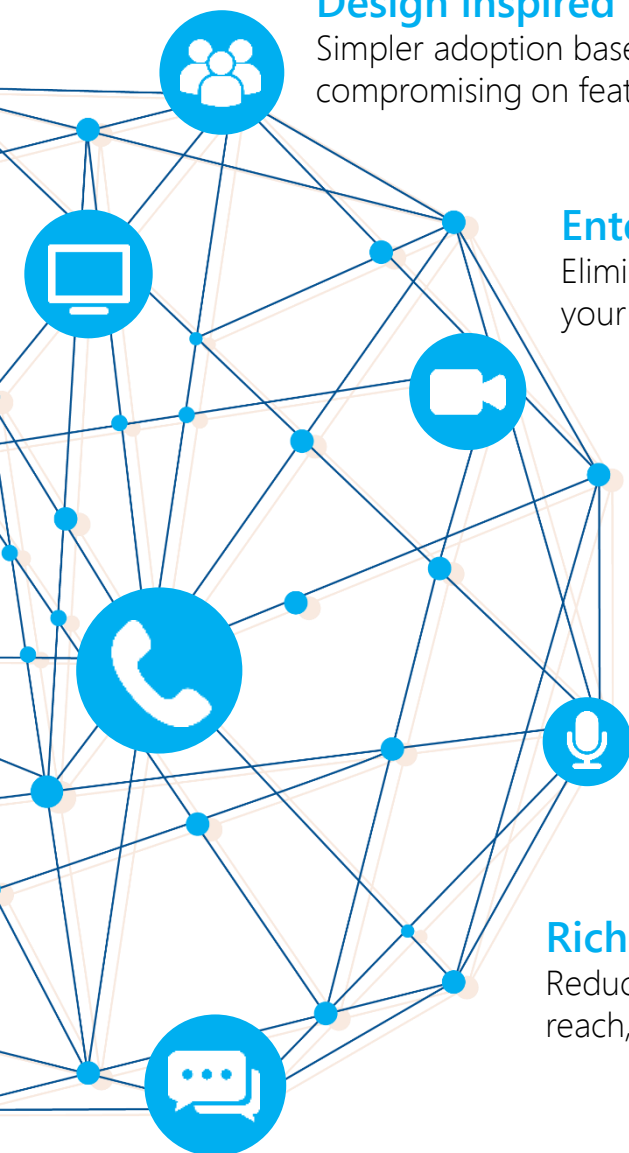

Expanding beyond the walls of your business to reach partners, prospects and customers

### Rich meeting experience

Reducing complexity and costs, as well as increasing productivity, reach, and freedom to work from anywhere

### Security and manageability

Modern products for global scale, security, and reliability

## Customer Testimonial

*"We have shifted more than 90 percent of our audio conferencing minutes onto Lync Server, which has saved Shell considerably."*

*"As we deploy Lync 2013 enterprise voice across the entire company, we will save more than \$3 million over the next three to five years."*

*"The fact that all the Microsoft applications have the same underlying management infrastructure is great. It expands the work our administrators can do."*
