

121 Video Calling

InFocus
Collaboration That Works

Cloud-based video dial tone at a down-to-earth price

Make spontaneous face-to-face video calls from your SIP video device with colleagues and partners around the world.

Tightly integrated with InFocus devices such as Mondopad and ConX Phone, so you can start having high quality video calls right when you plug them into your network.

- Place and receive high-quality video calls with your own SIP address
- Connect one-on-one instantly with almost any video conferencing system
- Affordable for any size organization
- Eliminate infrastructure on your premises – no H.323 gatekeepers, SIP proxies or gateways to buy or manage

121 Basic

Part #: IN121-1Y, IN121-2Y, IN121-3Y

Clear, high-quality 2-way video calling with your own registered SIP address for a great low price.

- Free for the first year with the purchase of a Mondopad, ConX Phone, or BigConnect software
- Data sharing
- Voice mail

121 Premium

Part #: IN121PRM-1Y, IN121PRM-2Y, IN121PRM-3Y, IN121PRM-UPG, IN121PRM-DOM

A must-have for Mondopad owners, 121 Premium adds the following features not available with 121 Basic:

4-Way Instant Conference

Add participants to a video call from your Mondopad* or ConX Phone with this handy feature only available with 121 Premium.

- Instantly add a 3rd and 4th person to your conversation
- No additional equipment to buy
- Maximum of 4 participants

Custom SIP Address

Have a SIP address that's all your own.

Create your own alias and use your organization's Internet domain

- People will call you at a SIP number that reflects you and your organization's identity
- Your address can be "5555@acmeroofting.com" or "pat@acmeroofting.com," for example
- Using your domain in your SIP address requires a one-time setup fee per domain (part #: IN121PRM-DOM)

Upgrade

Part #: IN121PRM-UPG

Upgrade 121 Basic (which comes free with every Mondopad) to 121 Premium for a great low price.

Free Calls from Mobile and Web

121 Video Calling Mobile App

- Share an application's screen
- No account required
- Windows and OSX compatible

121 Video Calling

Dialing Guide

Have easy, clear, affordable, HD video calls with SIP or H.323 devices whenever you want.

SIP-Based Dialing

How to call a SIP-based video device.

Equipment/Client Examples	Steps
InFocus Mondopad ConX Phone ...plus many others	Dial the SIP device's URI address xxxxx@infocus.net

H.323-based Dialing

How to place calls to an H.323-based video device.

Equipment/Client Examples	Steps
Polycom, Cisco, LifeSize, AVer, Sony...plus many others	Dial the H.323 device's IP address

H.323-based Receiving

How to receive calls from an H.323-based video device.

Equipment/Client Examples	Steps
Polycom, LifeSize, AVer, Sony ...plus many others	The H.323 device calls the number below based on THEIR location: <ul style="list-style-type: none">US: 67.212.233.236 ## <SIP extension>EU: 95.211.188.141 ## <SIP extension>Asia: 107.6.114.164 ## <SIP extension> <i>Example: If endpoint is 8001@infocus.net, dialing string should be (for EU) 95.211.188.141 ##8001</i>
Cisco (Tandberg) devices	The H.323 device calls the number below based on the caller's location: <ul style="list-style-type: none">US: <SIP extension>@67.212.233.236EU: <SIP extension>@95.211.188.141Asia: <SIP extension>@107.6.114.164 <i>Example: If endpoint is 8001@infocus.net, dialing string should be (for EU) 8001@95.211.188.141</i>

Browser-based Calling

Use a web browser to make unlimited free video calls to any SIP address. You don't need a SIP address of your own.

Equipment/Client Examples	Steps
Internet Explorer, Firefox, Chrome, Safari	<ol style="list-style-type: none">1. Enter http://121.infocus.net in your browser's address field2. Enter your name and the SIP number you wish to call3. Click CALL* <p>*If this is your first time at http://121.infocus.net, you'll be prompted to install the plug in. Once installed, follow the above steps to make your call.</p>
