ConX Video Meeting

Easy, high-quality video meetings at any time and from anywhere

InFocus
Collaboration That Works

Make important visual connections with people on the devices they already use with ConX Video Meeting.
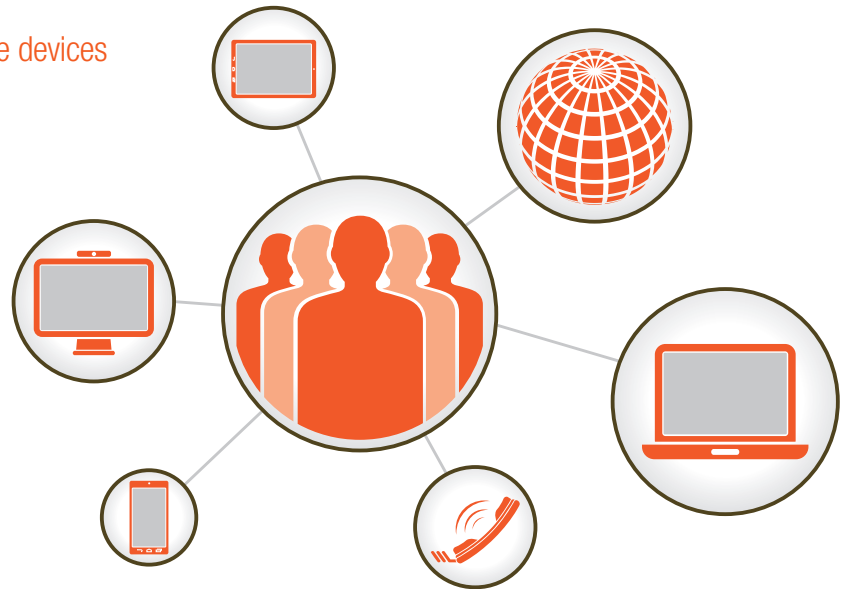

Bring people together from:

- Web browsers (PC or Mac)
- SIP or H.323 end-points
- Audio-only phones

Seeing is understanding

Meetings are more efficient when information is clearly communicated. Facial expressions, body language, objects, colors and more all help people understand the topics at hand, solve problems, save time and make a more personal connection.

Ready when you are

Great ideas can arrive at any time. Be ready with InFocus ConX. Invite people to a meeting with a simple web link and you'll see each others' faces in a matter of minutes.

Save time and money on travel

Stay connected visually to colleagues, partners and customers while saving thousands on airline tickets, hotels and other travel-related incidentals. Save time, stay home and still get valuable face time to nurture your personal relationships.

Easy to use

From a SIP device, simply call, enter the secure room code, and you're in. When multiple endpoints are dialed in, the interface will automatically resize the screens to highlight the one that's talking.

Key Features

- No equipment investment
- High definition video quality
- Meet with up to 25* participants/endpoints
- Participants can join from SIP or H.323 devices, PCs or Macs, or audio-only phones
- Share data and faces (dual stream) at the same time (depending on device)
- Manage and control your meetings from a web portal
- Easy to connect – dial a contact number and enter a PIN
- Participants can join with the click of one URL
- Global availability
- Full security

* Larger meeting rooms can be hosted by request.

Meet Using a Web Browser

Participants can easily join a ConX meeting from their PC or Mac using our free browser-based video conferencing client at conx.infocus.net. They can share data, too. No account needed.

One-click Participation

Plus, organizers can invite people to a meeting with a URL that has the meeting room and PIN built-in. Participants simply click the URL, enter their name and they're in.

Sample ConX Video Meeting URL
http://conx.infocus.net/8985:5898
In this example, we've used "8985" for the room and "5898" for the PIN.
